

Living easy news

houses are smarter, technology is easy life is better...

Dear Troy

Welcome to Living Easy ...

To Save Money and Avoid Grief - Plan Ahead!

Whether you are building your dream home or developing on a larger scale; treating your entertainment, technology and lifestyle facilities as an after-thought is a costly and inefficient way of doing things.

Planning your home's entertainment and technology integration should go hand in hand with selecting tiles, colour schemes, fittings and fixtures. It should happen at the design stage of the project, so that the lifestyle you dream of can be achieved, seamless and hassle free.

In keeping with contemporary, clean and uncluttered styles, many home owners desire discreet flush mounted colour-coded speakers throughout their homes. Left to the last minute it requires messy and costly patch up work. Nearly always the system will end up costing more and not be as convenient and user friendly.

At Demain Monde we're all about 'Living Easy' with technology.

Demain Monde Welcomes Troy Russell

We are proud to welcome Troy Russell to the position of Project Manager Troy brings to the role over 10 years experience in project management as well as exceptional IT skill, and is a fully qualified electronic engineer.

We have known and respected Troy for a number of years and we know he will fit well with our people and culture His professionalism and expertise will further strengthen our team.

Demain Monde Showcase Homes

Another popular entertainment / lifestyle choice in today's homes is an outdoor cinema experience, which can provide evenings of enjoyment & entertainment with family and friends. Our client in the Riverlinks Estate wanted just that; however there was an integrated barbecue in just the wrong place. Expensive and difficult to move now, but easy to design differently if entertainment needs were considered in the planning stage in collaboration with architects.

This is what we do. We work with architects house designers and home owners early to plan, and then integrate all technologies for economy, efficiency and simplicity.

Make contact early in the design stage for our recommendations with no obligation.

Firstlight Noosa

Demain Monde are proud to be working with Consolidated Properties and Blue Sky Capital on the new and prestigious Firstlight Noosa development. This stunning, absolute waterfront development is right on Hastings Street Noosa and features 20 apartments ranging in price from \$12 to \$15 Million.

The display apartment in Hastings Street is a great place to get a feel for the exceptional style, fittings and facilities that will be available to owners. Demain Monde has contributed to the fit out with its signature trademarks in entertainment and technology to offer a taste of what the rooms and the common areas of the property will be like.

At Firstlight Noosa, owners will enjoy a "new world" premium standard with a superb location and exceptional facilities.

The creativity and attention to detail necessary for a project like Firstlight Noosa is embodied in all our work regardless of project size.

One of the focal points of our business model is our showcase display home. Here home owners and developers can experience the latest in home entertainment and technology in a lifestyle setting; where you can touch, feel, and experience how this will perform in your own home.

Stay tuned for news on our next showcase home!

Website

If you visit our web site it currently shows an album of some of our work. This is being progressively upgraded for 2010 to incorporate 'Virtual Tour Technology' so people can see our exciting designs in action to gain a better understanding of how technology can enhance your lifestyle. Stay tuned and we will advise as stages are completed.

Exciting new technology and entertainment solutions.

Larger Developments choose Demain Monde

Creating competitive advantage in today's demanding world environment is never easy. More and more astute developers are using integrated entertainment and technology solutions to create that point of difference in a crowded market place.

Demain Monde's 'Intuitive Living Systems' will provide that point of difference for you.

Demain Monde partner with DAVD Engineering in large scale and multi-residential projects. The front end solutions, design, installation and project management offered by the DAVD / Demain Monde Partnership for large scale developments are second to none. Our current projects include: Novotel Brisbane, Hilton Hotel Gold Coast and Brisbane Airport.

DAVD specialise in complete, turnkey design solutions for delivery of an operational experience in the Home, Apartments, Commercial Entertainment Venue or International Hotel. This expertise coupled with Demain Monde's entertainment and lifestyle solutions is the perfect package for superior integrated design of multi-residential gated communities, hotels, resorts and high rise developments.

The Demain Monde / DAVD partnership as your technology architect offers you a unique "best of breed" solution for your total project entertainment and technology requirements. Our one supplier solution includes full engineering specifications, design and professional installation.

Unbeatable design, value and service!

Whether you are working on a major property development or have a question or two about your own home, please **give us a call!**

You may be surprised to see how a small investment can make a big difference to the marketability of your project or the enjoyment of your home.

**Call Joe or Troy on
